

Bharti, Vodafone top list of towers exceeding radiation limit

PRESS TRUST OF INDIA
New Delhi, August 9

BHARTI AIRTEL AND Vodafone were at the top of a list of operators whose mobile towers were found violating radiation norms in an audit conducted by the telecom department, Parliament was informed on Wednesday.

A total of 284 base transceiver stations have been found exceeding the limits as on June 30

“During the audit carried out by TERM Cells, total 284 numbers of BTSs installed on various mobile towers by various TSPs have been found exceeding the prescribed EMF radiation limits as on June 30, 2017,” telecom minister Manoj Sinha said in a written reply to the Lok Sabha. Of the total non-compliant

Loop Mobile (operations closed now), according to the data shared by the minister. Ten base station each of state-run firm BSNL and Reliance Jio, eight of Telenor (in process of merging with Airtel), three of MTNL, two of Videocon Telecom (merged business with Airtel) and one of Sistema Shyam have been found non-compliant to radiation rules till June.

Sinha said that the WHO main conclusion from the WHO reviews is that radiation exposures from mobile towers below limits prescribed under the International Commission on Non Ionizing Radiation Protection (ICNIRP) international guidelines do not appear to have any known con-

Petronas sees opportunity in LNG, lubricants and petchem

VIKAS SRIVASTAVA
Mumbai, August 9

MALAYSIA'S NATIONAL OIL company Petronas has set its sight on India's growing LNG, petrochemicals and lubricants market as it plans to further expand its presence in the country, a senior company official said on Wednesday.

CEO said.

He said a team of eight people from Petronas undertook a six-day tour of the country and visited non-oil companies to get a feel of the economy and growth in the country. He said with India's GDP growing at over 7% and energy demand even more than that, they are confident there is lot of scope in the country in terms of opportunities in the oil and gas sector.

The company has delivered 15 LNG cargoes to India in the last couple of years from its own set-up, the president and

Cummins gets ready for BS VI regime, working on powertrain systems

GEETA NAIR
Pune, August 9

EVEN AS WORK is on at Cummins India and its parent Cummins Inc to get ready for a BS VI regime by 2020 in India, the Cummins Group is transforming from a diesel engine maker to a powertrain maker.

Cummins is also working on hybrid and electrified powertrain systems and other alternate fuels to meet the challenges posed by disrupting trends.

“Cummins will have a full production unit — a Cummins electrified powertrain system in a customer vehicle and on the road by 2019, and range extended electric vehicle in 2020,” Srikanth Padmanabhan, president, Cummins Engine Business, Cummins Inc, said.

“Cummins will be the leading provider of electrified power systems in our commercial and industrial markets just as we are with diesel and natural gas driven powertrains,” he said.

While diesel engines are expected to continue in many of the markets there will be a new product mix on offer from the company.

“Electrification is coming to urban transportation and several other markets and Cummins will be the leading provider of electrified power systems in our markets,” he said.

City buses and school buses have already taken the electric route in the developed world and this would come to India too, he said.

“The advanced technologies that are in North America, Japan and Europe will be taken to India and China in a cost effective way,”

Cummins will open a new technology centre in Pune by the end of this year. The tech centre investment has been pegged at around ₹1,000 crore

Padmanabhan said. “The company is better positioned to get into emerging technologies as is has been working on this for 20 years on this,” he said.

It gives comfort to OEMs, which can focus on other things such as connectivity and automation as we focus on the engine, Padmanabhan said.

The advantage Cummins has over others is its long history, scale, existing relationships with OEMs and its global network, he added. “We have the scale advantage when it comes to design, manufacturing and purchase,” he said.

About India's shift to BS VI, Padmanabhan said India is doing it in three years while in the US it took seven to eight years. “This is much like how India skipped landlines and shifted to mobiles in the telecom space,” he said.

They are working on the engine technology, fuel systems, turbochargers and after treatment technologies which will be combined to meet the BS VI norms for India.

“India is a low-cost provider of these products and has a supply chain that will be leveraged by Cummins.”

Cummins will have a new technology centre in India at Pune which will open by end of this year. The tech centre investment has been around ₹1,000 crore and will have 2,500 people working for Cummins globally.
